

GHANSHYAM RAI

SUMMARY

Dedicated and eager frontend developer with a strong foundation in HTML, CSS ,JavaScript and React seeking opportunities to apply my skills and learn from experienced professionals.

PROJECTS

Portfolio Website

- Designed and developed a personal portfolio website to showcase my work and skills.
- Utilized HTML, CSS, and JavaScript to build the website, with a responsive design for optimal viewing on various devices.
- Incorporated a user-friendly navigation menu, and interactive project galleries, and integrated a contact form for inquiries.
- Project link:- <https://gsrai2002.github.io/Portfolio/portfolio.html>

Weather Application

- Developed a weather application using HTML, CSS, and JavaScript, which leverages API data to provide real-time weather information.
- Designed a "Forecast" tab for users to access extended weather predictions for the upcoming 5 days and plan accordingly.
- Project link:- <https://gsrai2002.github.io/Weather-App/weather.html>
